The stand is good, and

which openly hostile, and America covertly protecting her from every effort of our enemy. This will give us a chance of speedily terminating the war, or at least secure the opportunity of rendering it both safe and lucrative.

(To be continued.)

NEW YORK, June 12.
The ship Charleston, captain Hall, in 38 days from Liverpool, arrived at the quarantine ground last night. By this vessel we received London papers to the 1st May, and extract from them the following articles.

The house of Peers were proceeding to the trial of lord Melville. On the 1st of May, after the examination of some witnesses, Mr. Adam, counsel for lord Melville, made a most brilliant speech; and was followed by Mr. Plumer.

London, May 1.
By the Preyoyante store ship, arrived in the Downs, the following letter is received,

GIBRALTAR, 31st of March.

This day's letters from Spain state, that a war between that country and Portugal is certain, and that 50,000 French troops are on their march to Portugal. His majesty's ship Pompee, rear admiral sir Sidney Smith, captain Dacres, arrived here on the 27th instant, with a fleet under convoy from Falmouth, in 28 days passage.

This morning we received Paris papers to the 20th, and Dutch to the 26th. The return of the French troops who were evacuating Germany, has not only been suspended, but marshal Lefebvre's corps 20,000 strong, which had but a few days crossed to the left bank of the Rhine, has recrossed it at Menz, and advanced into Darmstadt. Great preparations are making to place Brannau in a respectable state of defence, and the head quarters of the French are still at Ulm. Yet an article from Stuttgart of the 12th states the suspension upon the return of the Austrian prisoners to Austria has been taken off; which would seem to shew that some arrangement of the difference between the two powers had taken place. The following are the principal contents of the French and Dutch papers, which are of considerable importance:

Paris, April 20.
Upon being continued in the office of president of the Tribune, M. Fabre de L'Aude, after expressing the grateful sense of the favor conferred upon him by the emperor and the Tribune, said, "Justice requires us, Gentlemen, to proclaim this truth, with which we must be all impressed by our official communications, with the emperor. The necessity of preserving France her freedom and independence, of recruiting her navy of opposing strong armes to the Continental Powers which might still think of weaving new plots, and new coalitions by violating the faith of treaties, could alone have induced his majesty to increase the indirect contributions."

The expenditure for the year is stated to be 894 millions (between 38 and 39 millions sterling).

Baron de Gravenreuth, the king of Bavaria's minister of war, and Envoy Extraordinary to the emperor of the French, is arrived at Paris. Admiral Villeneuve is also expected from Majorca.

Letters from the banks of the Rhine announce the entire suspension of all the orders relative to the evacuation of Germany by the French. Brannau, which was to be evacuated on the 3d, is to be fortified more strongly by the French. All the troops of the grand army have stopped in their march towards the Raine. Lefebvre's corps has even repassed to the right bank.

Frankfort, April 11.
General Kilkreath, has been ordered by his sovereign to take military possession of Pomerania and the Isle of Rugen. Resistance is expected.

Since the invasion of Dalmatia by the Russians, fresh clouds have darkened the political horizon, and Germany, which had already suffered so much, is once more deprived, for the moment at least, of the hopes of being released from the barthea of foreign troops. Marshal Berthier, has ordered the troops to halt, and Brannau is not to be evacuated. Lefebvre's corps has resumed, its cantonments in Darmstadt. Yet since general Leopold Berthier has set off from Vienna for Paris, it is said that all difficulties are removed between Austria and France, on the subject of Cattaro, and that till that place is surrendered to France, the latter will continue to occupy Brannau.

Hamburg, April 9.
Some fermentation is said to exist in Sweden. The Chamber of Commerce of Stockholm having been convoked last

letter was read from the King, in which he demanded a contribution to enable him to fit out 15 ships of the line or frigates to oppose the Swedish ships against the French privateers, which had taken a great number. This discussion caused some members to depict on the unseasome of naval power was projected by her naval alliance with England. It was unanimously decided that such should be granted to the King. We do not receive a word of this.

Upon the motion for the second reading of the bill for the repeal of an additional revenue act, an interesting discussion took place at the house of commons last night, in which Mr. Canning distinguished himself by one of the most argumentative & eloquent speeches we ever heard; he it said with infinite energy to the minor critics, who described themselves as concentrating all the talents and all the patriotism of the country. None of the ministers took any part in the discussion; a circumstance of singular nature.

Mr. Canning proposed as an amendment to the motion for the second reading of the bill, that it be read a second time that day three weeks.

A division took place, and 119 divided for Mr. Canning's amendment, 39 against it. The amendment was of course lost but the miners did not seem to be at all prepared to expect the opposition would divide so large a number, it doubles the amount of what the concurrence of all the miners, gentry, and patriotism of the country were in the habit of dividing during the greater part of Mr. Pitt's administration.

A short but sharp debate took place after the division.

To the question put by Mr. Canning, Mr. Windham replied, that he had no intention of making any alterations in the new military plan which he proposed before the recess.

Sea transports arrived in the Downs yesterday from the river with troops on board. Their destination is a profound secret.

In a second edition, yesterday, we insert the following communication sent to Lord's from the admiral v.

Admiralty Office, April 30,
half past one p.m.

The Donning, man of war arrived at Spithead this morning, and the following message has been received by the Telegraph:—Captain Macmillan passed cape May, with admiral Duckworth on the 20th of March.

The Donegal and the Braave parted company with the other ships, on the 8th of the Western Islands. On the morning of the 10th the Braave's main mast went overboard, and she began to open very much. The crew were therefore removed, but in the course of the day she foundered. She had been very much cut up in admiral Duckworth's action.

The Jupiter, one of the other prizes arrived at Spithead last night.

From the London Courier of the 1st of May.

Portsmouth, April 20.

This morning arrived the Donegal, of 90 guns, captain Pultney Malcolm, out of Sir John Duckworth's squadron, from Jamaica, from whence she sailed on the 8th of March, with the Canopus, 80, Rear Admiral Sir Thomas Louis, captain Astens, Spencer, 74, hon. captain Stopford, Jupiter, (prize) 74, Capt. Gill, L'Alexander, (prize) 74, captain Impey, and the Braave, (prize) 80, captain Boyer.

The Donegal and La Braave parted from the other ships on the 8th instant, off the Western Islands; and, on the 12th, during a heavy gale of wind, the Braave foundered. She had been much cut up in the action; on the morning of the 12th instant, her main mast fell overboard, and she was found to open very much; all her people were removed to the Donegal during that day, and in the evening she went down. Sir John Duckworth, in the Superb, captain Keats, with the Acasta frigate, captain Dunn, sailed from Port Royal for his station off Cadiz, several days before these ships. The Cædus, Spencer, and the other two prizes, it was expected by the Donegal would have reached Spithead before them, as they were detained two days of the gale in attending to La Braave. General Carmichael, who lost all his things in the Braave, is landed from the Donegal. The Avon sloop, captain Snell, which arrived last night from Lisbon, brings an account of sir Sidney Smith having joined Lord Collingwood, and that captain Digby was appointed to the Swiftsure, one of the Trafalgar prizes, which may be hourly expected home. The Pompee French frigate, was afraid to leave Lisbon, notwithstanding there were no ships watching her.

Deal, April 30.

A large fleet of Swedish merchantmen, are just arrived in the Downs from the Westward, and are now coming to anchor to wait for pilots to conduct them to the Nore, where they will remain till an English man of war is appointed to escort them to their different places of destination. This attention on the part of our government to the protection of the Swedish commerce is highly meritorious, at the same time that it shews the good understanding subsisting between the two kings.

Three or four sail of large coppered transports from the river, having on board the 21st regiment of foot, are come into the Downs where they will remain till joined by the rest of regiments that are destined by the same service; and so secret is the place of their destination kept, that the officers themselves only suppose they are going on foreign service. Conjecture says, the Cape of Good Hope, but it is probably mere conjecture.

Corn Exchange, April 30.

There are few fresh arrivals of wheat here to day, which is in but short supply, & few buyers in this trade. Grey peas a trifle dearer. Government having taken off the embargo on the Prussian vessels laden with oats, on security being given, they are now brought to market; but being mostly of second quality, and out of condition, they are sold at lower prices.

ABYED,

The brig Fancy, 120, in 22 days from Surinam. Left, ship Commerce, Stevenston, of Portland; brig Mary Jane, McCoules, in 10 days for Boston; and ship Diana, Cannon, in 3 days for Alexandria. In lat. 32° 40' long. 68° 30' spoke brig Fox, Lee, 19 days from Jamaica.

Alexandria Daily Advertiser.

MONDAY, JUNE 16.

The frigate mentioned in our last, to be below, is the Chichester, of 44 guns, commanded by Captain Stopford, belonging to Admiral Cockrane's squadron, on the windward station in 18 days from Barbadoes. The object of her coming here is, we learn, for stores.

(*New York Gazette*)

Captain Jenny, of the brig Quantibaycock, begs leave to inform navigators, trading to the West of Ireland, that a light house has been lately erected on the N. E. or North Point of Clear Island, and that another small light has been erected S. E. 1/4 E. at fourteen miles from Clear Island Light, which is placed on the point of the harbor of Westport, for the convenience of strangers running in during gales of wind.

[*ibid.*]

Extract of a letter from an American merchant, residing at Monte Video, dated March 20, 1806.

"A. order of the court has arrived here against our trading with this place, so that great difficulty will arise to obtain permission to trade, and indeed at present, I would not advise any speculation to come this way, as the government is extremely arbitrary, and the produce of this country is high, and no rights to be had."

Extract of a letter from Liverpool, dated May 8, to a gentleman in Philadelphia.

"Flour and wheat have taken a rise, in consequence of our being deprived of supplies from Prussia; and considerable orders have in consequence gone out to America. Speculations were yesterday made at \$16 per barrel, and I think there is every reason of its continuing at least as high as 50s during the summer, and on the approach of winter it will no doubt rise."

Low descriptions of Cotton are scarce in the market, which causes them to keep their present prices. The last arrivals from Charleston have been principally Sea Island.

We are this day favored with American papers announcing the unpleasant resolutions following to the resolution of Mr. Nicholson for prohibiting the importation of certain British goods which have passed in the House of Representatives. It is the general belief here that the Senate will not be so temperate as to sanction these proceedings.

"If they do I cannot see the least advantage that can result to your country from such a mode of conduct. America is certainly as yet but a child, not arrived at sufficient maturity to dictate laws to age and experience."

Upland Cotton,	15 1-2 to 15 3-4

no sale in consequence of the prices, and the imports being more extensive of late.

A gill of spirit, will clear several bedsteads, and the cost is but a few cents. It is a good method to mark the bottom of a singer with the solution and each foot of the bed posts.

Extract of another letter from a respectable house in Liverpool to their correspondents in Philadelphia:

"The gloom which overspread our market upon the first intelligence of the commercial aggressions of Prussia, was in a great degree very unexpectedly dispersed, by government having announced that ships under Papenburg and Kuyphusen colors may clear out for any port not under blockade upon conditions of returning to Great Britain within three months. These privileges will be of essential benefit to the holders of West India produce, and our cotton market partakes of this advantage in a high degree, since it is now clearly ascertained that channels are still left open for an intercourse with the continent, and it is to be hoped that the inconveniences usually attendant on new arrangements will speedily be surmounted.

"At first it was not doubted, that a system of complete exclusion had been formed, and that Swedish Pomerania would be destined to swell the catalogue of plundered provinces, previously to its cession to Prussia; but whether this boon is considered by his imperial majesty as too great for his faithful protege, or circumstances are not yet ripe enough in that quarter, it is not easy to determine.

This war has not yet been actually declared against Prussia, it is very generally expected, and the recent orders from Government not to pay any money on account of the freights of the detained cargoes, shew that the dispute is not yet in a train of amicable adjustment; indeed what can be expected by negotiation with a government which has lost its independence without striking a blow? Prussia must now send to Paris for instructions. Political topics have usually been considered as irrelevant in commercial correspondence but now when the cause of almost every alteration in our prices may be distinctly traced to some political event, the unfortunate alliance of commerce with politics is become too evident, and we could not state with sufficient precision, the causes which influence our prices, if we omitted the weightiest of them all.

In speaking of the bill lately before congress, respecting the impressment of American seamen by British ships of war, and which according to our advices, excited much attention in the British ministerial circles, a French official journal contains the following observations:

"We may here remark the energy of a nation that is conscious of its own dignity. America has no navy, compared with England she is weak; yet she is resolved to exert her utmost efforts, even to risk the perils of a war—nay, to perish! if it must be, in order to support the honor of her flag, and to assert and maintain her rights. With what shame must not such a conduct confound that other power, who, under the cannon of Nelson, betrayed the cause of nations, rent asunder the charter of sovereignty, and acknowledged as legitimate the tyranny of the English over the sea! Such are not the deeds that lead to glory."

"From that moment all the weaker states have been delivered over to the oppression of the powers of England, whose caprices are laws to which they must submit. What a marked difference there exists between the successors of Catherine and those of the old emperors!"

"Prussia is the only power that has no adhered to these principles so dishonorable to sovereigns. Denmark has defended herself in her capital, which was bombarded, and exposed herself to every kind of danger, but she was at length compelled to yield to the influence of her neighbour. It now belongs to America, to raise her voice, and loudly to reclaim the rights of all nations and to vindicate a cause, which the intrigues of England, with her threats and her money have induced the powers of Europe to betray."

It was observed of a gentleman, who possessed great learning, but was extremely silent in company, that his mind was library of the most valuable information upon which a sprightly female wittily remarked, that if it was a library, it was no circulating one.

To remove and keep clear of bed bugs. Aloe of the Succotrina kind, to be had from druggists and apothecaries, dissolved in an oil of spirit, will clear the consilence which may be applied to the joints and crevices of the bedsteads, or elsewhere, with a feather, will certainly kill and remove them. About an ounce of aloe in

a gill of spirit, will clear several bedsteads, and the cost is but a few cents. It is a good method to mark the bottom of a singer with the solution and each foot of the bed posts.

JAMES KENNEDY, SEN.

KING-STREET,

I ESPECIALLY inform the public that he has
received from LEE & CO's Patent and Family
Newspaper, New York, a well advertised oil of the
following

Valuable Medicines,

which are in high esteem and general use throughout
the United States, many of them being sold cheaper
than the drugs of which they are compounded could
be purchased at a retail store.

TAKE NOTICE
That J. Kennedy, sen. is appointed the only agent
for ALEXANDRIA.

Dr. HAMILTON'S ELIXIR,
A sovereign remedy for Colds, Chronic Coughs, Aches,
Mus. Catarrhs, Soe Throats, and approaching Con-
sumptions.

To Parents who may have children afflicted with
the HOOPING COUGH,

This discovery is of the first magnitude, as it is an
immediate relief; checks the progrès, and in a short
time entirely removes the most cruel disorder to which
children are liable—the Elixer is so perfectly agreeable
and the dose so small that no difficulty arises in tak-
ing it.

From LUTHER MARTIN, Esq. Attorney-Gen-
eral of the state of Maryland.

—Gentlemen,

I comply with your request in rating my opinion of
Hamilton's Elixer. It has been used in my family for
two or three years past, with uniform success, whenever
colds, coughs, or similar complaints have rendered medi-
cine necessary. I have myself found it an excellent
and agreeable remedy for a very painful and troublesome
affection of the breast, accompanied with soreness and
with obstructed and difficult breathing.

On these accounts, I do not hesitate to recommend
Hamilton's Elixer, as a valuable medicine, and deserving
public attention.

LUTHER MARTIN.

Mr. Alpheus Henry, Bridge-stone, Baltimore, was
cured by one bottle of Hamilton's elixir of a very com-
plicated disorder, occasioned by a severe cold caught
several months ago. He suffered with the greatest
difficulty, and was often thrown into weakening fevers
when he attempted to walk any distance, and his voice
would frequently fail in such a degree that he could
only attempt to whisper; he had been upwards of six
weeks without a return of his complaints and desirous to
give this public testimony in favor of this invaluable
medicine.

Dr. Hamilton's GRAND RESTORATIVE

Is recommended as an invaluable medicine, for the
speedy relief and permanent cure of the various com-
plaints which result from dissipated pleasures—juvenile
indulgences—excessive climates unfavorable to the
constitution—the immoderate use of tea, frequent in-
toxication, or any other degradative intemperance—the
unskillful or excessive use of mercury—the diseases pecu-
liar to females at certain period of life—bad living, in-
cc. &c.

And is proved by long and extensive experience to be
absolutely unparalleled in the cure of

Nervous Disorders, Violent cramps in the
Confusions, stomach and back, Indigestion,
Losses of spirits, Melancholy,
Losses of appetite, Impurity of the blood,
Hysterical affections, Gout in the stomach,
Feverish weakness, Pains in the limbs,
Seminal weakness, Involuntary motions,
Spermatorrhoea (or white) Impotency, &c. &c.

In cases of extremity, where the long prevalence and
obstinacy of disease has brought on a general impover-
ishment of the system, excessive debility of the whole
frame, and a wasting of the body, which no nourish-
ment or cordial could repair, a person voracious in the
use of this medicine has performed the most astonishing
cures.

HAMILTON'S ESSENCE AND EXTRACT OF MUSTARD.

A safe and effectual remedy for gout, rheumatism,
palsey, sprains, bruises, pains in the face and neck, &c.
And has performed more cures in the above complaint
than all the other medicines ever before made public.

From Dr. Weatherburn,
Wythe county, Virginia.

GENTLEMEN,

I purchased your soap the preparations you call Hamilton's Elixer, or Extract of Mustard, which I believe has perfectly removed a chronic rheumatism (of that kind named sciatica, or of the hip joint) under which I had labored for a long time, and which had baffled every article in the *Materia Medica*, and every mode of treatment resorted to for the cure of this obstinate disease. If you think this letter useful you are at liberty to make it public.

Yours, &c.

W. WEATHERBURN.

John Hoover, soap maker, South Second street, be-
tween Mary and Christian streets, Philadelphia, voluntarily
makes oath as follows, namely,

That his wife, Mary Hoover, was so severely afflic-
ted with a violent rheumatism very dangerously situated
the consequence of a severe cold, after lying in, as to be
confined to her bed for several weeks, and was at length
reduced to the melancholy apprehension of becoming a
cripple for life; notwithstanding the most respectable medical
advice was followed; and every probable remedy attempted;
when seeing severest cases cured, performed by
Hamilton's Essence and Extract of Mustard, they
were procured from Mr. Birch, No. 27, South Second
street. The first application enabled her to walk across
the room, and the use of one bottle restored her to her
usual state of health and strength.

JOHN HOOVER.

One of the justices of the peace for Phila-
delphia county.

HAMILTON'S WORM DESTROYING LOZENGES,

Which have within four years past cured upwards of
one hundred and twenty thousand persons of both sexes,
of every age, and in every situation, of various dangerous
complaints arising from worms, and from obstruc-
tions or fomfies in the stomach and bowels.

This medicine bears no analogy whatever of similar
titles, so commonly complained of as operating with vi-
olence, on the contrary a particular excellence of this in-

cludes nothing but what is perfectly innocent, and
so mild in its operation that it cannot injure the most
delicate pregnant lady, or the tender infant of a week
old should worms exist in the body; but will, with
one pain or griping, cleanse the stomach and bowels of
whatever is foul or offensive, and thereby prevent the
production of worms and many fatal disorders. They
are particularly efficacious in carrying off all sorts of
mucus and corruption, fomenta and bilious complaints
and the safest and mildest purgative that can be used on
the occasion.

Description of Worms, and the symptoms by which they are known.

Worms which infest the human body, are chiefly of
four kinds; viz. the *Tenes* or large round worm, the *Ascarides*, or small maw worm, the *Cœcumitis*, or string
worm, white worm, and lastly, the *Taenia* or tape worm
so called from its resemblance to tape: this is often ma-
ny yards long, and is full of joints—it is most hurtful
and most difficult to cure.

Among the symptoms attending worms, are disagree-
able breath, especially in the morning—Bad and corrupt-
ed gums—itching in the nose and about the seat—Con-
vulsions and epileptic fits, and sometimes palsy on the
speech—Snoring and grinding of the teeth in sleep—
Irregular appetite, sometimes loathing food, and sometimes
voracious—Purging, with slimy and fecid stools—Vom-
iting—Large and hard belly—Pains and sickness at the
stomach—Pains in the head and thighs, with twinges of
fright—Slow fever, with small and irregular pulse—A
dry cough—Excessive thirst—Sometimes pale and un-
healthy countenance; and sometimes the face bloated and
swelled.

Persons afflicted with any of the above symptoms
should have immediate recourse to Hamilton's worm
destroying lozenges, which have been constantly attended
with success in all complaints similar to those above
described.

A dose of this medicine given occasionally during the
warm season will effectually prevent the vomiting and
purging of children, a dreadful disorder which annually
destroys thousands of the infant part of our cities. It is
likewise the mildest and most certain remedy known and
is referred to health and strength a great number when
in advanced stages of this fatal complaint. Particular
and plain instructions are given for every part of the ne-
cessary treatment in such cases.

Children generally take this medicine with eagerness,
having a pleasing appearance, and an agreeable taste.

CASES OF CURES—

By Hamilton's
WORM DESTROYING LOZENGES,
(Selected from thousands) the authenticity of
which any person may ascertain either by letter
or personal application.

TAPE WORM.

Mr. SAMUEL FULLER, Inn keeper, in the Har-
ford road, ten miles from Baltimore, began about twenty
months ago to be grievously plagued with a tape worm,
which increased fast in size and strength, so as to excite
the most horrid sensations by his writhing motions and
intolerable pains, resembling the gnawing and tearing of
his bowels, which deprived him of his necessary sleep,
and caused such dreadful apprehensions as cannot be ex-
plained but by one in a similar situation; his appetite was
as rapid, and with that his strength, so that he was
unable to attend to any business—when he heard of
some excellent cures performed by Hamilton's worm
lozenges, he took a large dose, which brought away about
four YARDS of the worm now in the posses-
sion of Lee, &c. &c. but a renewal of his pains soon
convinced him that this monstrous reptile had recovered
its first vigor—Application was made to Lee & Co. for
more of their medicine, with their advice, from which
followed the total expulsion of his formidable enemy, in
several pieces, which he supposed to be SIX or EIGHT
YARDS more. A few months have since elapsed, and Mr. Fuller is now in perfect health. The above testi-
monial is well known to a number of his neighbors
and friends will gratify any who may wish to make
inquiries on the subject. Although Hamilton's worm
lozenges produce such powerful effects, when
necessary; yet they are perfectly innocent and mild in
their operation on the human body, even taken in large
doses, as Mr. Fuller will testify—their particular mild-
ness is abundantly evident in innumerable cures of in-
fants.

For the prevention and cure of bilious and mul-
tant fevers,

effects are speedy and permanent, rendering
skin delicately soft and clear, improving the
plexion, and restoring the bloom of youth. Not
failing to render an ordinary countenance beau-
tiful, and an handsome one more so.

The Restorative Powder for the Teeth and Gums.

This excellent preparation comforts & strengthens
the gums, preserves the enamel from decay,
and cleanses and whitens the teeth, by obliterating
all that acrimonious slime and foulness, which
is suffered to accumulate, never fails to injure
finally train them.

Dr. Hahn's genuine Eye-Water.

A sovereign remedy for all diseases of the eye,
whether the effect of natural weakness or of
diseases, obstructions of rheum, dullness, itching
fins on the eyes, never failing to cure them
ladies which frequently suffer the small pox,
measles and scurvy, and wonderfully strengthen-
ing a weak sight. Hundreds have experienced
its excellent virtues, when nearly deprived
of sight.

Tooth Ache Drops.

The only remedy yet discovered which gives
immediate and lasting relief in the tooth-ache
instances.

The Sovereign Ointment for the Head.

Which is warranted an infallible remedy at
application, and may be used with perfect safety
on pregnant women or on infants a week old,
containing not a particle of mercury, or any other
dangerous ingredient whatever, and is not accom-
panied with that tormenting smell, which
attends the application of other remedies.

The Anodyne Elixir.

For the cure of every kind of head-ache.

Indian Vegetable Specific.

A safe and speedy remedy for the venereal disease.
An ounce of prevention is worth a pound of cure."
